

April 2015
VDC Update and News
<http://vdc.dgs.virginia.gov>

On April 1st, a new web release was put into production. There is new functionality for our customers as well as bug and cosmetic issues were corrected.

The new functions include:

- Prices in the online product catalog!
- Ability to click on the product number link for details (long descriptions, pictures, etc) of the product via the online product catalog
- Order status lookup – Open, Transmitted, Picking and Shipped
- Added quick order method (old “expert mode”) to the punch-out catalog

During the course of 2015, chemical manufacturers are required to update their current Material Safety Data Sheets (MSDS) to a new format, consistent with the international Globally Harmonized System (GHS). The new sheets will be named Safety Data Sheets (SDS). Requirements are for manufacturers to have the new SDS in distribution by May 1, 2015, and distributors (including VDC) to have them in distribution to end users by December 1, 2015. VDC will be replacing the current MSDS with the new SDS in the online catalog as they are received from our vendors.
